## Zinc Oxide 10% Spray on

Abena's Zinc Oxide Cream Spray protects and regenerates the skin, promoting a natural skin restoration for up to 24 hours. Thanks to its spray applicator friction is minimized and the applicator also helps to prevent contamination.

The Zinc Spray helps to improve skin barrier, which results in hydrated skin that is protected against potential irritants (for example urine). Zinc Oxide is known for its antiseptic properties and the spray has been purposefully designed to help calm irritated skin.

The 10% Zinc Oxide helps skin recover more rapidly compared to no treatment. This product is suitable where moderate IAD is present.

- Contains Calendula and Chamomile known to soothe, calm and promote the natural recovery of the skin.
- Sprays a perfectly thin layer because of TLT (Thin Layer Technology)
- Use where moderate signs of IAD are visible
- Shake before use
- Use a spraying distance of approximately 5 to 10 cm. It is not necessary to further rub in the cream
- Use at every continence product change.
- Dosage according to need
- Do not apply on cracked or broken skin
- No colorants or perfume
- Produced for Abena A/S, DK under ISO 13485, GMP, ISO 22716

Art. no.	Product	Size	pH	Pcs./box
1000003933	Zinc Oxide 10% Spray-On	100 ml	5-6	24

Solvent, filler	Aqua
Emollient	Coco-Caprylate/Caprate
Humectant	Glycerin
